

### Innovative intranet based self-service Human Resource information system that saves time, enhances efficiency & cuts costs

E-HR is an innovative Intranet based HR system and toolkit which provides online support to managers in achieving the HR responsibilities and ensuring consistent best practice.

E-HR helps cut costs and gives confidence to managers by providing a broad range of HR information including answers to commonly asked questions, case studies, letter templates, policies, guidelines and many other supporting e-documents

The system is user friendly, available 24 hours a day, 7 days a week.

Optional add-ons are also available for logging and tracking every Employee Relation interaction that the HR team have with any manager or member of staff

### Benefits

- Supports and up-skills the line managers to manage their staff effectively
- Reduces the need for large numbers of HR staff
- Ensures actions are consistently taken in line with the latest employment laws and best employment practices
- Allows analysis of frequently viewed pages and documents to ensure that information is relevant and specific to the organisation
- Provides plain English approach, de-mystifying HR jargon
- Ensures consistency of approach across entire organisation

### Developers

- Barts and The London NHS Foundation Trust
